

I claim:

1. A transportable turf comprising:

a porous foundation;

a soil-less sand based root zone medium comprising sand in an amount of at least about 60% by weight, and wherein the sand has grains with a size range of from about 0.05 mm to about 1 mm; and

grass having a root system;

wherein said root system extends through said root zone medium into said porous foundation and intertwines therewithin.

2. The transportable turf according to claim 1 wherein the root zone medium also contains organic amendment.

3. The transportable turf according to claim 2 wherein the organic amendment is canadian sphagnum peat moss.

4. The transportable turf according to claim 1 wherein the grains of sand have a uniform size ranging from about 0.18 mm to about 0.84 mm.

5. The transportable turf according to claim 1 wherein the root zone medium also comprises fertilizer.

6. The transportable turf of claim 1 wherein said porous foundation is a geotextile.

7. The transportable turf of claim 1 wherein said porous foundation is formed of a plurality of substantially laterally disposed separate strips.

8. The transportable turf of claim 1 wherein said root system intertwines said separate strips to bind said strips together.

9. The transportable turf of claim 1 wherein said porous foundation is biodegradable.

10. The transportable turf of claim 1 wherein said porous foundation is not biodegradable.

11. The transportable turf of claim 1 wherein said turf is in a length and width sufficient to cover a sports field with a single tract.

12. The transportable turf of claim 1 wherein said turf comprises at least one tract having a width of about 40 to 45 feet.

13. The transportable turf of claim 1 wherein said turf comprises at least one tract which is at least about 3 times as wide as the width of the porous foundation.
